APPENDIX · ILLUSTRATIVE MOCKUP · SIMULATED DATA · VERSION 3

The Nihel Sun care launch, shown as Instagram Insights screens

July, August and the whole launch window (5 July – 1 September 2026), redrawn from the reference Instagram Insights screenshots. All figures are taken from the version 2 simulation, and the day-by-day charts come from the same deterministic model, so every total is the exact sum of its parts.

Views · July	Views · August	Views · window	Followers · 1 Sep
97,308	**169,532**	**269,098**	**35,774**

Interactions · window	Accounts reached · window	Net followers · window	Publications
4,452	**69,914**	**+3,186**	**27**

What is observed and what is estimated

O **Observed:** Dates, formats, likes, visible comments and public Reel view counts of every publication; 4,486 views on 20 July; 46 likes on 13 Aug; 2,137 likes, 110 comments and 107K views on 15 Aug; 132 likes and 11 comments on 21 Aug; followers on 15 Apr (28.2K), 14 Oct (38.8K) and 23 Oct (40.4K).

E **Estimated:** Views of static posts, reach, shares, saves, profile visits, stories, day-by-day split, followers per day and all audience data.

Scope: as in Instagram, the screens cover the whole account, so the three other-range posts (13, 15 and 21 Aug) appear in top content. The split between sun care and other ranges is given in the table opposite.

Reading the screens: the date selector reads “Custom”, as Instagram shows it for a custom range; each range is stated under every screen and on the chart axis. Bars are drawn as Instagram draws them: views and interactions as a share of the total, audience bars as a percentage of 100%.

Reconciliation by period

Metric	July	August	1 Sep*	Window
Views	**97,308**	**169,532**	**2,258**	**269,098**
Reels	61,041	140,509	1,441	202,991
Posts	13,567	13,423	17	27,007
Stories	22,700	15,600	800	39,100
Interactions	**1,108**	**3,318**	**26**	**4,452**
Likes	703	2,585	12	3,300
Comments	43	171	4	218
Shares	62	257	2	321
Saves	50	134	1	185
Story replies	250	171	7	428
Profile visits	**292**	**548**	**7**	**847**
Bio link taps	10	19	1	30
Business address taps	2	3	0	5
Net followers	**+1,441**	**+1,691**	**+54**	**+3,186**
Follows	1,715	2,013	65	3,793
Unfollows	274	322	11	607
Accounts reached	**30,560**	**50,993**	**–**	**69,914**
Followers at end	**34,029**	**35,720**	**35,774**	**35,774**
Best day	**8 Jul · +54**	**15 Aug · +71**		**15 Aug · +71**

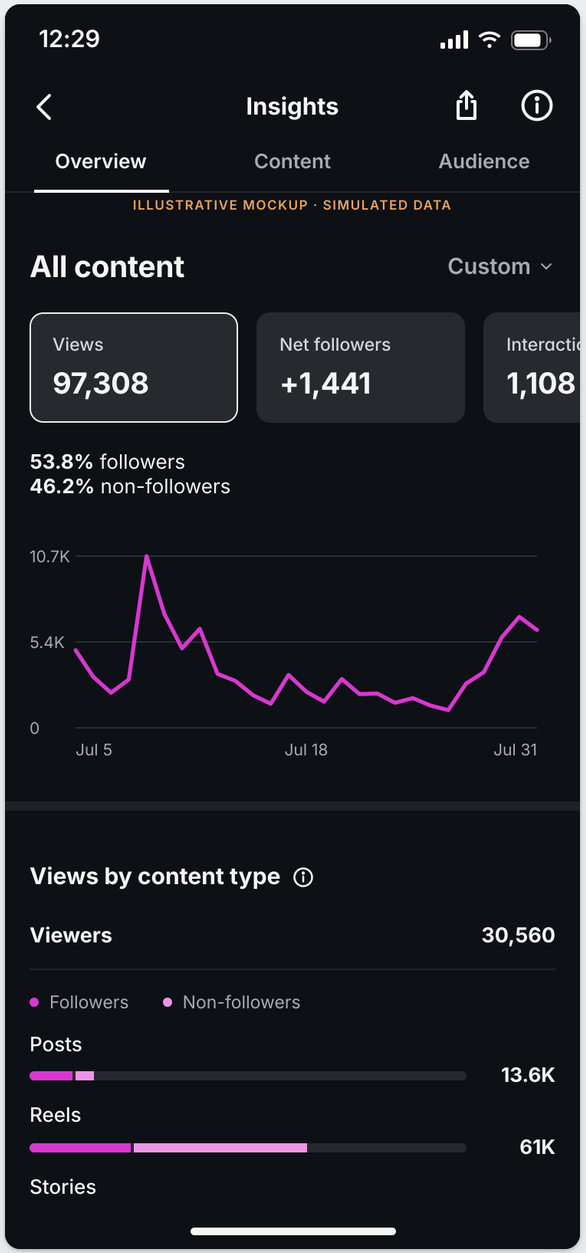

* 1 September = window − July − August. Accounts reached is not additive: the same people see several pieces (rule 4), so it has no 1 Sep value. Followers start at 32,588 on 4 July.

Sun care vs other ranges

	July			August			Window		
	Sun	Other	Account	Sun	Other	Account	Sun	Other	Account
Views	97,308	0	97,308	52,563	116,969	169,532	152,111	116,987	269,098
Interactions	1,108	0	1,108	538	2,780	3,318	1,672	2,780	4,452
Accounts reached	30,560	–	30,560	15,956	–	50,993	40,127	–	69,914
Profile visits	292	0	292	146	402	548	445	402	847

Campaign check: 24 sun care posts and 3 other-range posts; all sums on this page and on the screens are re-computed by `scripts/model.py`.

Rules (applied identically to every period)

1. Day by day. Each publication's lifetime figures are spread over its first 30 days, 40% on day 1 and then −40% a day; whole numbers, so each post's days add up exactly to its lifetime value. A period counts what happens inside it, as Instagram does, so late-July Reels also bring views in August.

2. Views. Reels + posts + stories. Stories keep the totals of the first reconstruction (22,700 July, 15,600 August, 800 on 1 Sept); the caravane days (9–12 July) count 2.5×.

3. Interactions. Likes + comments + shares + saves + story replies.

4. Accounts reached. 55% of the summed reach (the same people see several pieces); over the 59-day window a further 15% overlap is applied. Stories reach = story views ÷ 1.6.

5. Followers. Start 32,588 on 4 July; each day +52.8 + 1 per 50 likes and comments received that day (all content). Unfollows = 16% of gross follows.

6. Other-range posts. 13 and 21 Aug posts reach = likes ÷ 2.4%, views = reach × 1.35; 15 Aug Reel reach = views ÷ 1.9; shares 10% and saves 5% of likes; non-followers 75% (viral Reel), the same rules as the sun care posts.

7. Profile visits. 0.63% of reach per post + 0.25% of story views; bio taps 3.5% and address taps 0.6% of visits.

Follower model, week by week

Week	Likes + comm.	Gain	/day	Followers
5 Jul – 11 Jul	249	+375	53.6	32,963
12 Jul – 18 Jul	182	+373	53.3	33,336
19 Jul – 25 Jul	103	+371	53.0	33,707
26 Jul – 1 Aug	273	+376	53.7	34,083
2 Aug – 8 Aug	127	+372	53.1	34,455
9 Aug – 15 Aug	992	+389	55.6	34,844
16 Aug – 22 Aug	1,441	+399	57.0	35,243
23 Aug – 1 Sep	151	+531	53.1	35,774

The 15 Aug Reel's likes arrive over several days, so its effect spreads over 9–22 Aug; the 21 Aug body mist post adds to 16–29 Aug (highlighted). Charts on the screens plot these daily values: views per day, and net followers per day (“Overall”). Top gridline = highest day, as in Instagram.

Publications (lifetime) · 24 sun care + 3 other ranges

	ID	Date	Format	Views	Reach	Likes	Com.	Shares	Saves	Visits	ER

	O2	15/08	Reel	107,000	56,316	2,137	110	214	107	355	4.56%
	O3	21/08	Post	7,425	5,500	132	11	8	9	35	2.91%

O1 = 13 Aug Fête de la femme post, O2 = 15 Aug black-and-white Reel, O3 = 21 Aug body mist post (11 comments from the campaign total; 1 is visible on Instagram). S07 = corrected 20 July view count. ER = (likes + comments + shares + saves) ÷ reach. Thumbnails are cropped from the account's public grid, matched by date order and format.
