APPENDIX · ILLUSTRATIVE MOCKUP · SIMULATED DATA · VERSION 3

The Nihel Sun care launch, shown as Instagram Insights screens

July, August and the whole launch window (5 July – 1 September 2026), redrawn from the reference Instagram Insights screenshots. Figures: the version 2 simulation plus three Reels that only show in the Reels tab (5, 20 and 25 July), added with the same rules; the day-by-day charts come from the same deterministic model, so every total is the exact sum of its parts.

Views · July	Views · August	Views · window	Followers · 1 Sep
196,418	**170,822**	**369,498**	**35,778**

Interactions · window	Accounts reached · window	Net followers · window	Publications
4,714	**138,211**	**+3,190**	**30**

What is observed and what is estimated

O **Observed:** Dates, formats, likes, visible comments and public Reel view counts of every publication; 4,486 views on 20 July; 46 likes on 13 Aug; 2,137 likes, 110 comments and 107K views on 15 Aug; 132 likes and 11 comments on 21 Aug; followers on 15 Apr (28.2K), 14 Oct (38.8K) and 23 Oct (40.4K). Three Reels shown only in the Reels tab: 5 Jul creator collab with rihab.labidi.5243 (20.7K views, 73 likes, 10 comments), 20 Jul sun pack collab with drest.tn (36.4K views, 91 likes, 4 comments), 25 Jul Fête de la République (43.3K views, 51 likes; no comment count shown, taken as 0).

E **Estimated:** Views of static posts, reach, shares, saves, profile visits, stories, day-by-day split, followers per day and all audience data.

Scope: as in Instagram, the screens cover the whole account, so the other-range publications (25 Jul Fête de la République Reel; 13, 15 and 21 Aug) appear in top content. Reels hidden from the profile grid still count, as in Instagram. The split between sun care and other ranges is given in the table opposite.

Reading the screens: the date selector shows the period of each screen (Instagram itself would read “Custom” for a custom range); the range is also stated under every screen and on the chart axis. July screens end on 31 July, so the 15 Aug Reel only appears from August on. Bars are drawn as Instagram draws them: views and interactions as a share of the total, audience bars as a percentage of 100%.

Reconciliation by period

Metric	July	August	1 Sep*	Window
Views	**196,418**	**170,822**	**2,258**	**369,498**
Reels	160,151	141,799	1,441	303,391
Posts	13,567	13,423	17	27,007
Stories	22,700	15,600	800	39,100
Interactions	**1,369**	**3,319**	**26**	**4,714**
Likes	917	2,586	12	3,515
Comments	57	171	4	232
Shares	83	257	2	342
Saves	62	134	1	197
Story replies	250	171	7	428
Profile visits	**622**	**552**	**7**	**1,181**
Bio link taps	22	19	0	41
Business address taps	4	3	0	7
Net followers	**+1,445**	**+1,692**	**+53**	**+3,190**
Follows	1,720	2,014	64	3,798
Unfollows	275	322	11	608
Accounts reached	**76,855**	**70,599**	**–**	**138,211**
Followers at end	**34,033**	**35,725**	**35,778**	**35,778**
Best day	**9 Jul · +55**	**15 Aug · +72**		**15 Aug · +72**

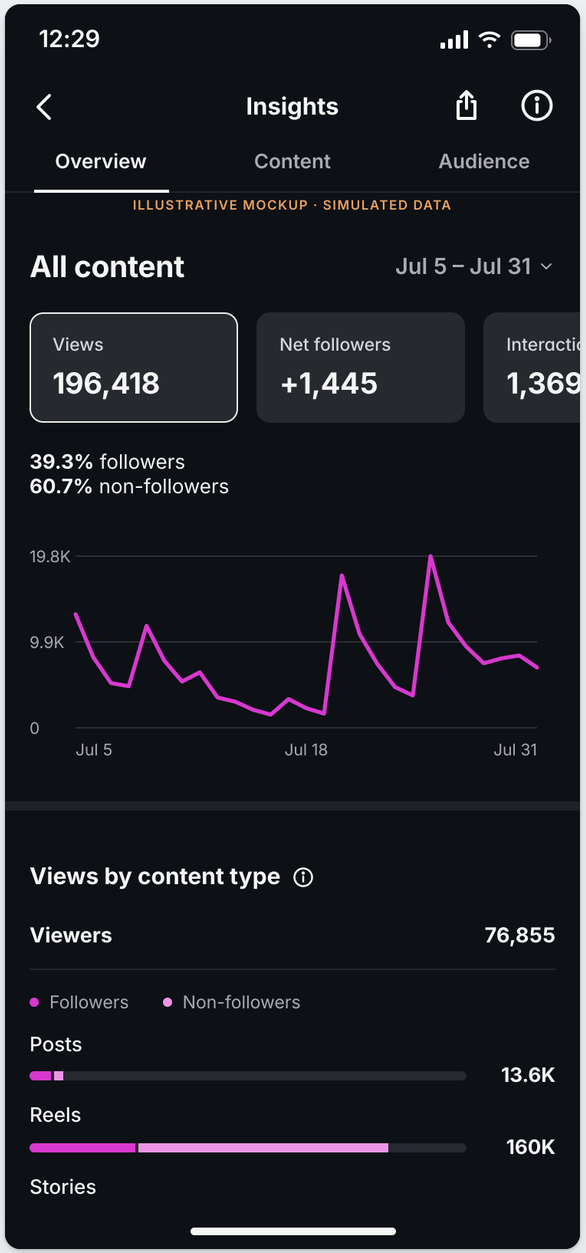

* 1 September = window − July − August. Accounts reached is not additive: the same people see several pieces (rule 4), so it has no 1 Sep value. Followers start at 32,588 on 4 July.

Sun care vs other ranges

	July			August			Window		
	Sun	Other	Account	Sun	Other	Account	Sun	Other	Account
Views	154,330	42,088	196,418	52,641	118,181	170,822	209,211	160,287	369,498
Interactions	1,311	58	1,369	538	2,781	3,319	1,875	2,839	4,714
Accounts reached	57,196	–	76,855	15,992	–	70,599	66,179	–	138,211
Profile visits	482	140	622	146	406	552	635	546	1,181

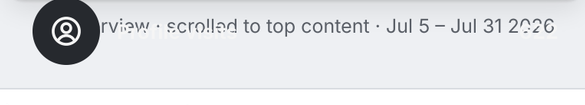

Campaign check: 26 sun care and 4 other-range publications, 3 of them only in the Reels tab; all sums on this page and on the screens are re-computed by `scripts/model.py`.

Rules (applied identically to every period)

1. Day by day. Each publication's lifetime figures are spread over its first 30 days, 40% on day 1 and then −40% a day; whole numbers, so each post's days add up exactly to its lifetime value. A period counts what happens inside it, as Instagram does, so late-July Reels also bring views in August.

2. Views. Reels + posts + stories. Stories keep the totals of the first reconstruction (22,700 July, 15,600 August, 800 on 1 Sept); the caravane days (9–12 July) count 2.5×.

3. Interactions. Likes + comments + shares + saves + story replies.

4. Accounts reached. 55% of the summed reach (the same people see several pieces); over the 59-day window a further 15% overlap is applied. Stories reach = story views ÷ 1.6. Correction (v3): the 15 Aug Reel's non-follower reach (75% of its reach) is new audience, so it is counted in full and only its follower reach goes through the overlap rule; otherwise August would reach fewer accounts (50,993) than that single Reel (56,316).

5. Followers. Start 32,588 on 4 July; each day +52.8 + 1 per 50 likes and comments received that day (all content). Unfollows = 16% of gross follows.

6. Other-range posts. 13 and 21 Aug posts reach = likes ÷ 2.4%, views = reach × 1.35; 15 Aug Reel reach = views ÷ 1.9; shares 10% and saves 5% of likes; non-followers 75% (viral Reel), the same rules as the sun care posts.

7. Profile visits. 0.63% of reach per post + 0.25% of story views; bio taps 3.5% and address taps 0.6% of visits.

8. Reels-tab Reels (v3). Same rules as the 15 Aug Reel: reach = views ÷ 1.9, shares 10% and saves 5% of likes, profile visits 0.63% of reach, non-followers 75% of views; their non-follower reach is counted in full in accounts reached (rule 4 correction). Followers follow rule 5 (1 per 50 likes and comments).

Follower model, week by week

Week	Likes + comm.	Gain	/day	Followers
5 Jul – 11 Jul	330	+376	53.7	32,964
12 Jul – 18 Jul	184	+373	53.3	33,337
19 Jul – 25 Jul	214	+374	53.4	33,711
26 Jul – 1 Aug	308	+376	53.7	34,087
2 Aug – 8 Aug	127	+372	53.1	34,459
9 Aug – 15 Aug	992	+390	55.7	34,849
16 Aug – 22 Aug	1,441	+398	56.9	35,247
23 Aug – 1 Sep	151	+531	53.1	35,778

The 15 Aug Reel's likes spread over 9–22 Aug and the 21 Aug post over 16–29 Aug (highlighted). Charts plot these daily values; top gridline = highest day, as in Instagram.

Publications (lifetime) · 26 sun care + 4 other ranges

	ID	Date	Format	Views	Reach	Likes	Com.	Shares	Saves	Visits	ER
